

700kg Vibrosifter GY-600-3S

Product Description:

- The Vibrosifter is an industrial sifter that is a round-shaped sieving machine that can grade, remove impurities, and separate liquids. The vibrating effect is an excellent sieving technique in order to remove excess contaminants and come up with clean and perfectly graded powder.

Uses of Vibrosifter:

- **Impurity removal**
 - A few oversize or undersized particles can be easily separated by the Vibrosifter from your products using a rotary shaker machine.
- **Grading**
 - This can separate particles precisely and continuously. The multi-layer can separate different groups of particles at the same time.
- **Separation of liquids and solids**
 - The Vibrosifter is used to separate solids from solid-liquid mixtures easily and hassle-free.

Specifications:

- Mesh: #30
- Diameter (mm): 550 mm
- Motor (Hp): 1 hp
- Material: Base - SS 410 Painted
: Sieve - SUS 304
- Power: 220V, 60hz, 3phase
- Capacity (kg / hr): 700 kg/hr
- Dimension (LWH) mm: 800 x 800 x 1050
