

Spar 8 Qtz. Mixer SP-800

Features:

- Controls: Separate start and emergency stop buttons so operators can shut down the mixer immediately in an emergency situation, and thermal overload protection
- Transmission: Heat-treated, hardened alloy, precision milled gears operate with planetary action. Gears are packed in a long-lasting, high pressure grease. This unique design yields high-torque mixing power while avoiding the high cost encountered repairing direct-drive transmission components.
- Finish: Power Coating
